

Continuing Education Units (CEUs)

\$25.00

Students can earn **Continuing Education Units** or **CEUs** for courses (see the individual courses for the number of units available in each class). These are not to be confused with college or university credit, but instead are a measurement standard for non-credit education. In order to earn CEUs, the CEU certificate must be purchased. CEU certificates can be purchased at any time following the successful completion of the course requirements as long as records exist regarding the student's successful completion of the course. The price is for the certificate rather than per unit.

CEUs are different from the various certificates that students can earn. Students who wish to purchase both CEU and course certificates at the same time receive a 20% discount. **If you wish to take advantage of this option, please click on the CEU+Certificate option.**

It should be noted that the CEU credits awarded by Webby Cyber Classes are **not** authorized by the International Association for Continuing Education and Training (IACET) or any professional association. It is the student's responsibility to keep and present the certificate to whatever organization requires it. Webby Cyber Classes keeps a record of any CEUs awarded in case students need later verification.

Disclaimer

Webby Cyber Classes does not guarantee that all entities will recognize CEUs earned through these classrooms. However, many organizations will approve CEU credits upon evaluation of the syllabus, course description, course lessons, assignments, and testing methods. Instructor bio information is available upon request.
