

# Dog & Cat First Aid and CPR

This is a self-paced course with continuous enrollment

**\$25.00**

Pets, particularly kittens and puppies, are so busy exploring their new environments that they don't understand the trouble they can find. To varying degrees, most of us child-proof our homes when we have an exploring toddler who cannot be watched every second. But, it is not so easy to do the same for a young pet because they find trouble where no child would dream of looking. Like babies, anything that will fit in their mouths typically ends up there. However, the sharp teeth of your pets can make this habit even more life-threatening than it is for small children. For example, electrical cords are perceived as a great chew toy, whose dangers are unrecognizable to the young animal.

Would you know what to do if your puppy chewed through the insulation to the hot wires of a table lamp? Are you planning a vacation with your pet as a companion? Or, do you perhaps live in a rather remote locale, far away from the nearest veterinarian? In other words, are you prepared to help your cat or dog in an emergency? No? Then this class is for you.

You will learn basic first aid tips such as cleaning a wound, performing CPR, how to deal with shock, making splints, etc. Learn what over-the-counter human medications can help or harm your pet. Also, learn how to quickly determine what is wrong with your pet. By knowing what to do in an emergency and acting quickly, you can save your pet's life. Don't you owe as much to one of your most loyal and faithful family members?

**WARNING:** Some material presented in the Understand Pet First Aid and CPR class is of a graphic nature and may be offensive to some students. Viewer discretion is advised.

The course will deal at length with the following Topics:

- Lesson 1 – Your Pet's Essential Medicine Chest
- Lesson 2 – Appraising The Situation
- Lesson 3 – How To Perform Basic Techniques
- Lesson 4 – Dealing With Your Pet's Allergies And Asthma
