

## **Medical Transcription Buzz**

It was very thorough, and it was harder then when I went to college to get my Bachelor's degree in accounting. The dictations were very helpful. Having the right equipment, foot pedal mainly, made taking the course easier.

Very organized and informative.

I was just amazed by how useful this class was. I had been away from MT work for 8 years, and of course when you apply for online work you have to take tests. I was awfully slow with the simplest objective tests before I took this course, and now I just breeze right through them. This course triggered my medical vocabulary, and just brought it back to me.
